DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Weigert (5,795,057).

3. Weigert discloses a lamp housing having a light emitting opening turned in a direction of a surface to be illuminated at least one lamp in the housing for producing light which is emitted in a light cone toward the surface and a lens plate disposed across the opening and comprised of a multiplicity of micro lenses (32, col. 4 lines 62-67) for rendering the light cone as it passes through the lens plate substantially homogenous and sharp edged where the light cone meets the surface (fig 7); the surface is a floor (col. 1 lines 50-57), the micro lenses are directly adjacent one another,

Allowable Subject Matter

4. Claims 5-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art cited of record does not teach the generally spherical recesses in the lens plate.
